

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

FACTS FOR THE CURIOUS.

Thomas Jefferson and John Adams died on the 4th of July, 1826. John Adams died in his ninety-first year, and was eight years older than Thomas Jefferson ; Thos. Jefferson was eight years older than James Madison ; James Madison was eight years older than James Monroe ; James Monroe was eight years older than John Q. Adams. The first five of our Presidents—all men of the Revolutionary epoch—ended the terms of their service in the sixty-sixth year of their age.

FIRST SEVEN PRESIDENTS.—Four of the seven were from Virginia ; two, of the same name, were from Massachusetts, and the seventh was from Tennessee. All but one were sixty-six years old on leaving office, having served two terms ; and one of these who served but one term would have been sixty-six years of age at the end of another. Three of the seven died on the 4th day of July, and two of them on the same day and year. Two of them were on the sub-committee of three that drafted the Declaration of Independence, and these two died on the same day and year, the anniversary of the Declaration of Independence, and just half a century from the day of declaration. Of the first five only one had a son, and that son was also President.

RELIGION OF THE PRESIDENTS.—The religious belief of the eighteen persons who have filled the Presidential chair in the United States, as indicated by their attendance upon public worship, and the evidence afforded in their writings, may be summed up as follows—Washington, Madison, Monroe, Harrison, Tyler, Taylor and Buchanan were Episcopalians ; Jefferson, John Adams, John Q. Adams and Fillmore were Unitarians ; Jackson

TREASURERS OF THE UNITED STATES. 111

and Polk were Presbyterians; Mr. Van Buren was of the Dutch Reformed Church; President Pierce a Trinitarian Congregationalist; Lincoln, Presbyterian; Johnson and Grant, Methodist.

BLUE EYES.—It is said that all the Presidents of the United States, except General Harrison, had blue eyes. Among the great men of the world the blue eyes appear to have been predominant. Socrates, Shakespeare, Locke, Bacon, Milton, Goethe, Franklin, Napoleon and Humboldt, all had blue eyes.

Eleven Rebellions in the United States.

Since the organization of the Federal Government eleven attempts have been made to resist its authority. The first was in 1782—a conspiracy of some of the officers of the Federal Army to consolidate the thirteen States into one, and confer the supreme power upon Washington. The second in 1787, called Shay's Insurrection, in Massachusetts. The third in 1794, called the Whisky Insurrection of Pennsylvania. The fourth in 1814, by the Hartford Convention. The fifth in 1820, on the question of the admission of Missouri into the Union. The sixth was a collision between the Legislature of Georgia and the Federal Government in regard to the lands given to the Creek Indians. The seventh was in 1830, with the Cherokees in Georgia. The eighth was the memorable nullifying ordinance of South Carolina, in 1832. The ninth was in 1842, in Rhode Island, between the Suffrage Association and the State authorities. The tenth was in 1856, on the part of Mormons, who resisted the Federal authorities. The eleventh was the late attempt at Secession.

Composition of the United States Senate—Forty-third Congress.

The body consists of seventy-four members, fifty-six of whom were members of the last Congress, while one had previously served, and of the new men three have been in the House. Fourteen Senators have been Governors of States. The oldest Senator is Simon Cameron, born 1799; the youngest is Mr. Dorsey, of Arkansas, born in 1841. Conover and Spencer are next. There are twelve Senators between sixty and seventy years of age; twenty-eight are between fifty and sixty;

as many more between forty and fifty, and five others are between thirty and forty. There are forty-eight lawyers, five railroad operators and managers, four farmers and planters, two ex-clergymen, two journalists; there is one merchant, manufacturer, miner, civil-engineer, ex-army officer, lumber dealer, government freighter, and two others in business. There is not a banker in the body. There are three ex-Confederate Generals, and two judges. There are eleven Senators who served in the Union army, attaining the rank of Major and Brigadier-General, and two others who held field positions. Nine were born in Pennsylvania, six in New York, six in Virginia, five in Maine, five in Massachusetts, four in Ohio, five in Vermont, three in New Jersey, two each in Rhode Island, Connecticut, Delaware, North Carolina, Georgia, Illinois, Indiana, Kentucky; one each in Alabama, South Carolina, Louisiana, Michigan, Missouri, Tennessee, Ireland, Germany, and Wales.

The Dome of the Capitol.

The dome of the Capitol at Washington is the most important work of architecture in America. It is 100 feet higher than the Washington monument at Baltimore, 68 feet higher than that of Bunker Hill, and 28 feet higher than that of Trinity Church tower at New York. It is a vast hollow sphere of iron, weighing 8,000,200 pounds. Directly overhead is a figure in bronze, "America," weighing 14,985 pounds. The pressure of the iron dome upon the piers and pillars is 13,477 pounds to the square foot, and St. Genevieve, at Paris, 68,000 pounds more. It would require to crush the supporters of this dome, a pressure of 755,270 pounds to the square foot. The cost was about \$11,000,000.

PASSAGES FROM THE LIFE OF CHARLES KNIGHT, Publisher, Author and Leader in the Work of Popular Education ; Editor of the "Penny Encyclopædia," "The Libraries of Useful and Entertaining Knowledge" and "The Popular History of England." Revised and Abridged from the English Edition. Large 12mo, about 450 pp. With Portrait.

The life of a man like Charles Knight, who may be said to have founded that system of Popular Education which brings the highest literature of the language within the reach of the lowest of the people, should possess a special interest for readers in a nation at the basis of whose institutions such a system must lie. The publication of the "Penny Encyclopædia" and "The Library of Useful Knowledge" completely revolutionized the whole method of teaching the English people. Mr. Knight was, perhaps, the first to perceive that text-books alone could not supply all that was necessary to the development of popular intelligence. What was required to supplement the text-books had hitherto been accessible only to the wealthier classes, but in the admirable series of works planned by Mr. Knight, the clearest scientific information on the one hand, and on the other a knowledge of the higher literature, were placed within the reach of every member of the poorer and working classes.

Apart from this work, Mr. Knight's life was interesting from his association during a most important half century with nearly all classes of the leading and thinking men of Great Britain. The story of his labors is simply and dramatically told in his own language, which has been left unchanged as far as was consistent with the slight abridgement that it has been considered advisable to make from the more voluminous English edition.

† HAYDN. A DICTIONARY OF DATES, RELATING TO ALL AGES AND NATIONS, FOR UNIVERSAL REFERENCE, Edited by BENJAMIN VINCENT.

The new (14th) English edition. With an American Supplement, containing about 200 additional pages, including American Topics and a copious Biographical Index. By G. P. Putnam, A.M. In one very large volume of more than 1,000 pages. Price, \$9; half Russia, \$12.

This is the most comprehensive and reliable book of reference in this department ever published. The last English edition of the original work is given entire, together with American additions which were essential to the completeness of a volume which is marvelous for its fulness and accuracy. No good library can dispense with this volume.

(The only other "Haydn Dictionary" in the market is made up from the 12th English edition, and is now far from complete.)
